

## **fibo intercon Service+ for mobile batching plant 2200**

3 years warranty, secured uptime and support

Your partner in concrete solutions

# Service+ for mobile batching plant 2200

*Included in the fibo service+ package is the following:*

## 1 – Extended warranty (2 years extension)

1 year standard – 2 years extension (3 years in total).

**fibo service+**  
Maximum uptime

## 2 – Modem

Modem for online support. Service technicians are with a modem able to get easy access to the mobile batching plant and diagnose the problem via the data log from the machine.

The modem ensures fast support and a maximum uptime

## 3 – Start kit

The kit is fitted with the equipment used within the first period according to the operation and maintenance documents. According to fibo intercon this will help the start-up of your new machine and a good start of the maintenance.

### 1 set of start kit includes the following

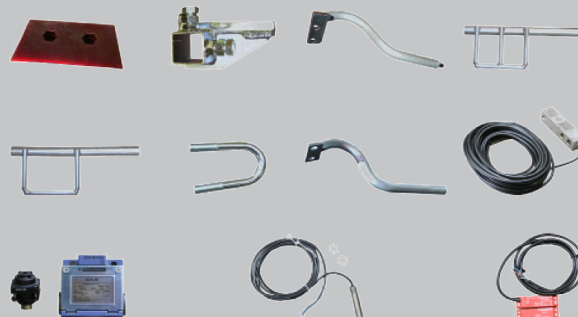

Oil for mixer gears	: 10 ltr.
Form oil	: 5 ltr.
Spray for form oil	: 1 pc.
Manual grease gun	: 1 pc.
Tubes of grease	: 2 tubes
Silicone for rubber belts	: 1 can
Tool for belt tightening	: 1 pc.
Voltmeter	: 1 pc.
1 year oil change for gears	: 10 ltr.

#### 4 – 2 sets of spare kit

Containing spare parts for the mixer. The recommended spare part kit contain the following parts. Under normal concrete production conditions the 2 sets are sufficient for 3 years of production.

##### 1 set of spare kit includes the following:

Mixing shovel	: 15 pcs
Mixing shovel	: 1 pc.
2200 mixing arm S-shaped – outer	: 1 pc.
2200 mixing arm S-shape	: 6 pcs.
2200 mixing arm	: 1 pc.
Finger scraper model “n”	: 2 pcs.
Finger scraper model “m”	: 1 pc.
Fitting for mixer arm	: 2 pcs.
Safety clamp for mixing arm	: 15 pcs.
Side scraper	: 1 pc.
Support for side scraper	: 1 pc.
Inductive sensor	: 2 pcs.

***If extra spare parts are needed contact us for further information.***

#### 5 – Operator training day with certificate at fibo intercon before delivery

Make sure your operators know the basics about the machine before the batching plant is shipped. The operator training is on the ordered batching plants. This ensures a high quality and a good start with the batching plant.

## Renovation of the C1200 from 2003 – Now, Ready for 15 Years more

### Carlsberg Bjælker, Denmark

*In connection with the relocation of Carlsberg Beams to our new production hall at Hammershøj Teglværk, we have, in cooperation with Fibo Intercon, been renovating our mixing plant.*

*The mixing plant plays a key role in the production of overlays, which makes it essential to have a plant with high reliability.*

*Although the mixing plant did not have many years on the bag, we had to admit that it had not been cleaned and maintained sufficiently. Therefore, it was considered that a renovation of the facility made sense, although a renovation is not cost-free.*

*After the renovation, the plant is now being used as a new one - This helps to put a line in the sand for the operator who is keen on the mixing plant to not look like it did before the renovation.*

*Therefore, we also benefited from the advice and guidance given by Fibo Intercon in how the plant is to be serviced, maintained and cleaned.*

*Fibo Intercon also provided advice and guidance during startup of the plant, which has been highly appreciated by operators who operate the plant daily.*

*We now feel better equipped to handle the page tasks associated with the operation of a mixing plant, and look forward to taking our "new" mixing plants into our new production hall.*

Conditions for extended warranty:

Only original fibo intercon spare parts must be used as spare parts.

The warranty is one year or 2000 working hours.

The customer must follow the guidelines according to the operation and maintenance documents delivered with the machine.

Documentation list (Last page in the user manual) has to be fulfilled with maintenance completed. This must be sent every 6 months within the warranty period to the email [info@fibointercon.com](mailto:info@fibointercon.com). Failure to do so will void the warranty. Attached in the email must be pictures of the clean mixer to ensure the cleaning quality and extend the lifetime of the batching plant
